## **DETAILED ACTION**

### ***Response to Amendment***

Applicant's amendment filed on May 9, 2005 has been entered. No claims have been amended. Claims 1-11 have been canceled. No claims have been added. Claims 12-17 are still pending in this application, with claim 12 being independent.

### ***Claim Rejections - 35 USC § 103***

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gifford (U.S. Patent No. 5,812,776) in view of Bayless et al. (U.S. Patent No. 5,754,636).

Art Unit: 2642

Regarding claim 12, Gifford teaches a method of obtaining information about a called party at a calling party device, the method comprising:

entering a telephone number for the called party at the calling party device (column 7, lines 61-63);

receiving at the calling party device an address for locating a customized file of the called party (column 8, lines 13-15); and

retrieving the customized file at the calling party device using the address received (column 8, lines 15-23).

Gifford fails to teach communicating from the calling party device with the called party over a voice channel associated with the telephone number. However, Bayless et al. teach a computer that can make and answer calls (Fig. 41). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the use of computer system to make a call taught by Bayless et al. to modify the computer system disclosed by Gifford in order for the user more convenient and efficiently communicates with other parties.

Regarding claim 13, Gifford further teaches the method wherein the address comprises an URL address (column 8, lines 13-15).

Regarding claim 14, Gifford further teaches the method wherein the customized file comprises a World Wide Web page for the called party (column 8, lines 15-23).

3. Claims 15-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gifford (U.S. Patent No. 5,812,776) in view of Bayless et al. (U.S. Patent No. 5,754,636), and further in view of Parzych (U.S. Patent No. 6,115,384).

Art Unit: 2642

Regarding claims 15-17, Gifford and Bayless et al. fail to teach the calling party's device is mobile phone. However, Parzych teach using a mobile to download a web site (column 6, lines 30-35). Therefore, it would have been obvious to have included the mobile phone in Gifford in view of Bayless et al. to have download a web site feature taught by Parzych to enable the calling party to access a particular web site of the called party by a mobile phone and thereby saving time and convenient for the calling party not to be fixed at a particular location.

***Response to Arguments***

4. Applicant's arguments with respect to claims 12-17 have been considered but are moot in view of the new ground(s) of rejection.
